PROFESSIONAL EXPERIENCE

Software Developer Engineer intern

2025 – Present
Bangalore

Scaler 

- Engineered a containerized multi-agent reinforcement learning platform (**rl_rover**, **rl_gmail**, **rl_calendar**) within a single **Docker image**, synchronizing 100+ concurrent state changes per second at sub-50ms inter-module latency.
- Designed and executed zero-downtime **PostgreSQL migrations using Alembic and Prisma ORM**, eliminating all deployment-related database outages for two production RL simulations (**Stripe**, **Ramp**).
- Built a **FastAPI + Pydantic** service layer handling financial simulation requests with strict **schema validation**, reducing API-related bugs by an estimated 40% during QA cycles.

SKILLS

Languages — Python | Java | SQL | JavaScript | TypeScript

Frontend — Html | CSS | Javascript | Next.js | React.js | Material UI | Tailwind CSS | Redux | UI/UX

Backend — Node.js | Express.js | MYSQL | Restful APIs | FastAPI | Pydantic | Alembic

Databases & ORM — PostgreSQL | Prisma | MongoDB | MySQL | Alembic

Tools — Git | GitHub | GitHub Actions | JWT | OAuth | AWS | AWS EC2 | Visual Studio Code | Figma | Postman | Docker

Core Skills — Object-Oriented Programming | Data Structures & Algorithms | REST API | SQL Optimization | Operating System | DBMS | SDLC

Soft Skills — Leadership | Teamwork | Communication | Public Speaking | Agile Methodologies

PROJECTS

RL Simulation Platform (Stripe & Ramp and multi_rl)

11/2025 – Present

Next.js, FastAPI, PostgreSQL, Prisma, Alembic, Python, Docker

- Architected a containerized **Multi-Agent Reinforcement Learning (RL)** ecosystem using **Docker**, **FastAPI**, and **PostgreSQL**.
- Engineered a scalable **DBMS** layer with **Prisma** and **Alembic** utilizing robust **System Design** principles, executing zero-downtime database migrations to support continuous simulation throughput.
- Deployed a real-time observability dashboard using **Next.js** and **TypeScript**, visualizing **Model Context Protocol (MCP)** metrics to accelerate financial modeling cycles.

Blog AI

07/2025 – 09/2025

HTML, CSS, React.js, Node.js, Express.js, MongoDB, Redux, Tailwind CSS, JWT, OAuth

- Integrated the **Gemini API** into a full-stack **React.js** and **Node.js** application via secure **RESTful APIs**, accelerating automated content generation by **70%** and reducing manual effort by **50%**.
- Orchestrated a highly available cloud deployment on **AWS EC2** using **Git/GitHub** for version control, achieving **99.9%** system uptime.
- Optimized backend **Data Structures & Algorithms** within **Express.js** and **MongoDB** to handle concurrent data requests, securely supporting **500+** daily active users with JWT authentication.

Expense Tracker Web App "Save Smartly"

04/2025 – 05/2025

HTML, CSS, React.js, Node.js, Express.js, MongoDB, Redux, Material UI, JWT

- Designed and implemented a responsive frontend using **React.js**, **Material UI**, and **Figma**, translating complex financial data into UI components for **100+** daily active users.
- Built robust backend services leveraging **Java**, **Node.js**, and **Express.js**, ensuring secure JWT session persistence and maintaining a **99.9%** application uptime.
- Deployed on Render with auto-scaling, supporting 3x traffic spikes without downtime.

EDUCATION

B.Tech in Computer Science, Bennett University

09/2022 – 05/2026
Greater Noida, India

CGPA: 8.0/10

AWARDS & ACHIEVEMENTS

Smart India Hackathon, SIH 2024

- Ranked Top 15% (37/250 teams) by building a scalable digital solution for problem statements.

RESEM 3RD PRIZE, IEEE 2023

- Awarded 3rd Prize in the IEEE Research Seminar (RESEM) for contributing innovative insights.

CERTIFICATES

- Certificate in Data Structures and algorithms
- Certificate in Design and Analysis of Algorithm

★ VOLUNTEER EXPERIENCE

- Technical Member-Geeks for Geeks

Conducted Various events in our college, which resulted in increasing 40% students
